

Metrocar

Funnel Analysis

By Anhelina Baftalovska

About

- Metrocar's business model is based on a platform that connects riders with drivers through a mobile application.
- Metrocar acts as an intermediary between riders and drivers, providing a user-friendly platform to connect them and facilitate the ride-hailing process.
- Metrocar currently supports 3 different platforms: ios, android, and web.

Funnel Analysis Overview

Funnel Analysis by User

Num of Users /Percent of Top Difference/ Percent of Previous

Downloads 23,608 100.00%	Downloads 23,608 100.00%
Signups 17,623 74.65%	Signups -5,985 74.65%
Ride Requested 12,406 52.55%	Ride Requested -5,217 70.40%
Ride Accepted 12,278 52.01%	Ride Accepted -128 98.97%
Ride Completed 6,233 26.40%	Ride Completed -6,045 50.77%
Payment 6,233 26.40%	Payment 0 100.00%
Review 4,348 18.42%	Review -1,885 69.76%

Avg Rides Per User Per Step

Ride Requested	Ride Accepted	Ride Completed	Payment	Review
31	20	35	34	35

Funnel Analysis by Ride

Num of Users /Percent of Top Difference/ Percent of Previous

Ride Requested 385,477 100.00%	Ride Requested 385,477 100.00%
Ride Accepted 248,379 64.43%	Ride Accepted -137,098 64.43%
Ride Completed 223,652 58.02%	Ride Completed -24,727 90.04%
Payment 212,628 55.16%	Payment -11,024 95.07%
Review 156,211 40.52%	Review -56,417 73.47%

A significant portion (74.65%) of users who download the app proceed to sign up. This indicates a strong initial user interest.

The drop-off between "Ride Requested" and "Ride Completed" is substantial. Identifying and addressing issues in this stage can boost user retention

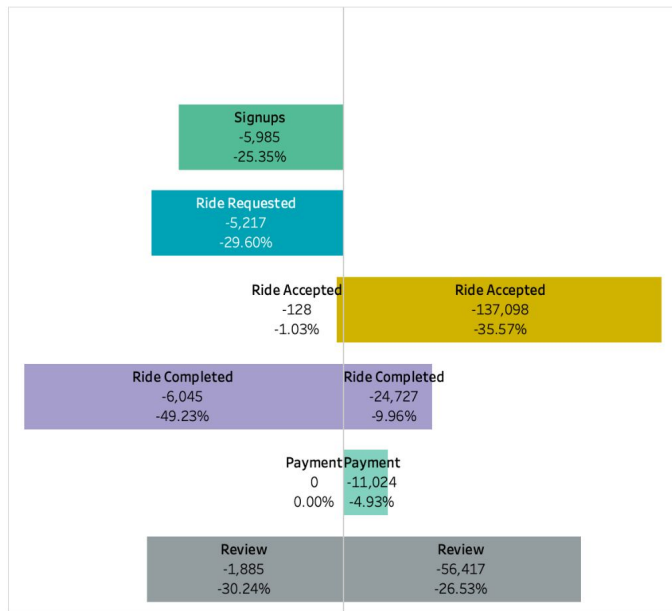

"Ride Completed" - has the highest, and "ride accepted" the lowest average rides per user, which implies that users might face difficulties in getting rides.

Drop-Off Points

Drop-off Analysis

By User

By Ride

Conversion Rate Over Time

The most significant drop-off at user level occurs at the "Ride Completed" stage. Needs further investigation

The most significant drop-off at ride level occurs at the "Ride Accepted" stage. Users might face challenges in this stage.

The conversion rate for "Signups" fluctuates over months. Understanding these variations can improve the onboarding process.

Platform Analysis

Platform

Null	3,562	1,787	636	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0

iOS and Android are the dominant platforms. Allocate marketing resources accordingly.

The web platform lags behind iOS and Android in conversion rates.

The highest conversion rate is at the payment stage, but iOS and Android have higher review conversion rates.

Age Group Analysis

Funnel Analysis by age range (User count/ Percent of Top)

The 25-34 age group has the highest user count and engagement at all stages.

The 18-24 age group has strong conversion rates for several stages.

User Count by Age

18-24	1,865
25-34	3,447
35-44	5,181
45-54	1,826
Unkno..	5,304

Surge Pricing

Surge Pricing by Hour

Surge Pricing by Day of the Week

Rides VS Canceled by Age

Rides VS Canceled

Ride requests are high during morning and evening hours, suggesting potential for surge pricing during these times.

Ride requests remain consistent throughout the week, indicating a uniform surge pricing approach.

Waiting Time

MAX Time

Ride Duration	90.00
Time Before Ride	15.00
Time To Accept	20.00
Accept To Cancel	10.00
Request To Cancel	30.00

AVG Time

Ride_time	52.63
Time Before Ride	8.48
Time To Accept	6.88
Accept To Cancel	5.95
Request To Cancel	12.50

Min Time

Ride Duration	15.00
Time Before Ride	2.00
Time To Accept	2.00
Accept To Cancel	2.00
Request To Cancel	2.00

AVG Wait Time by Hour of the Day

AVG Wait Time by Month

Wait times vary throughout the day, with shorter wait times in the early morning hours.

January exhibits the longest average wait times.

Recommendations

Area	Description
Simplify Onboarding:	Streamline the user registration process for better sign-up rates.
Optimize Ride Acceptance:	Improve the ride acceptance system to enhance user experiences.
Boost Review Engagement:	Encourage more user reviews through user-friendly processes.
Target iOS Users:	Allocate marketing resources to engage iOS users effectively.
Implement Surge Pricing:	Introduce surge pricing during peak hours for revenue optimization.
Enhance Evening Experience:	Focus on improving user satisfaction during peak evening hours.

Thank You!
